

Market Microstructure, Volume Profile & Sentiment

Intelligence\n### ICT 0DTE Multi-Strategy Algorithmic Trading

Platform\n\n### 1. Volume Profile

Point of Control (POC) & Value

Area\n POC Migration Analysis:

Computes intraday volume

distribution profiles to identify the

Point of Control (POC).\n Value

Area Boundaries (VAL / VAH):

Price acceptance inside or outside

the Value Area dictates strategy

selection (credit spreads at

extremes, debit spreads on

breakout migrations).\n\n### 2.

Tavily News Sentiment & Multi-

Agent Reasoning\n Macro Hazard

Filtration:* Integrates Tavily

search API and Nvidia/OpenAI

LLM reasoning loops to scan for

high-impact macroeconomic

events (FOMC, CPI) prior to order

generation.
